Nurse Calling System

Family Photo

A Nurse Calling System is a smart communication tool used in hospitals, clinics, and care centers. It allows patients to call for help instantly, ensuring quick response from medical staff. With features like wireless alerts, display panels, and audio-visual signals, it improves patient safety, care quality, and staff coordination making healthcare faster, easier, and more organized.

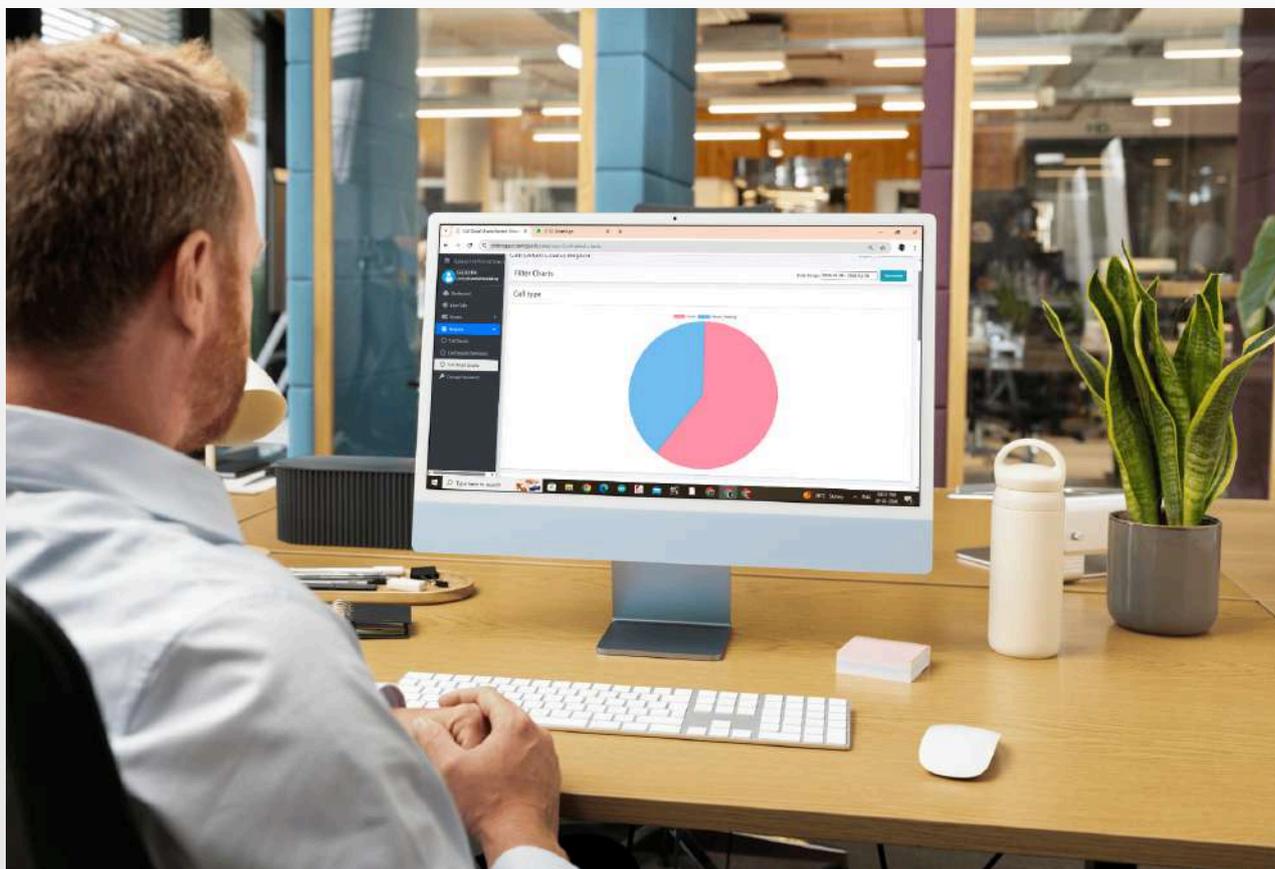

Key Features

1. Clear Audio & Visual Alerts.
2. Low Maintenance & Reliable Operation.
3. Versatile Wired & Wireless Options.
4. Emergency Pull-Cord Support.
5. Unattended Call Escalation.
6. Robust & User-Friendly Design.

Applications

1. Hospitals/Clinics.
2. Healthcare Centres.
3. Pharmaceutical Industry.
4. School / Mall/ Supermarket.
5. Factory.
6. Old-Age Home.

Applications

Nurse & Housekeeper Calling

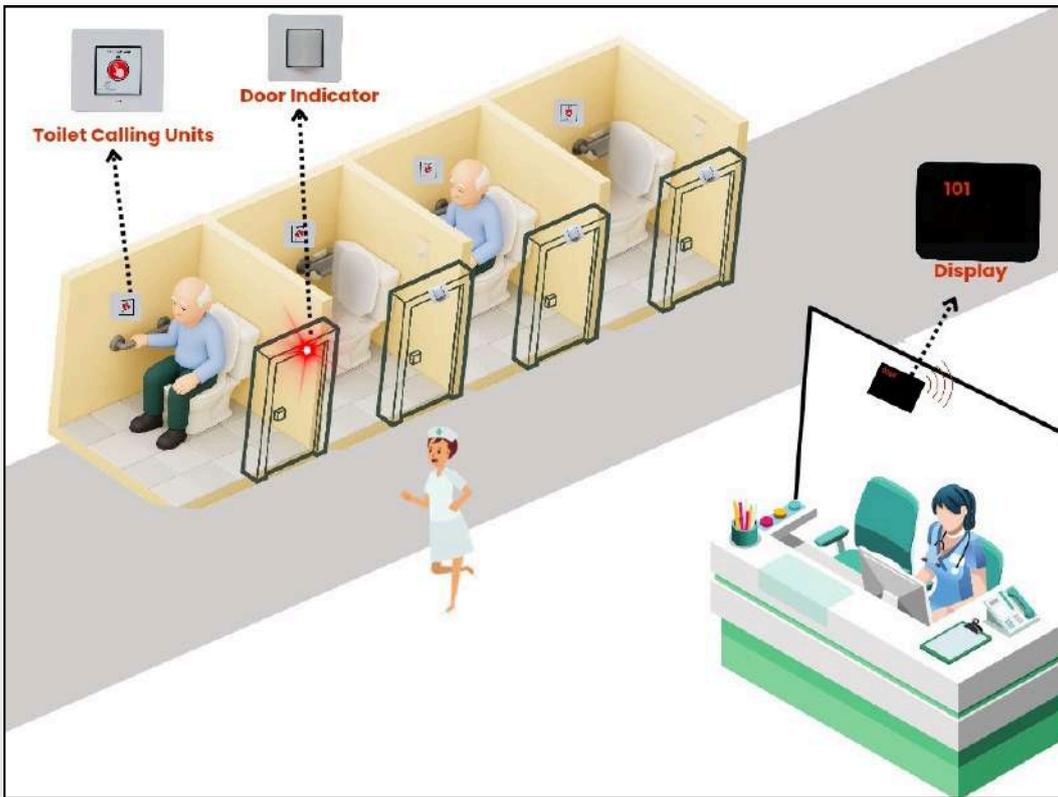

Patients can call for assistance through the unit, instantly alerting nurses or housekeepers on the central display for a quick response.

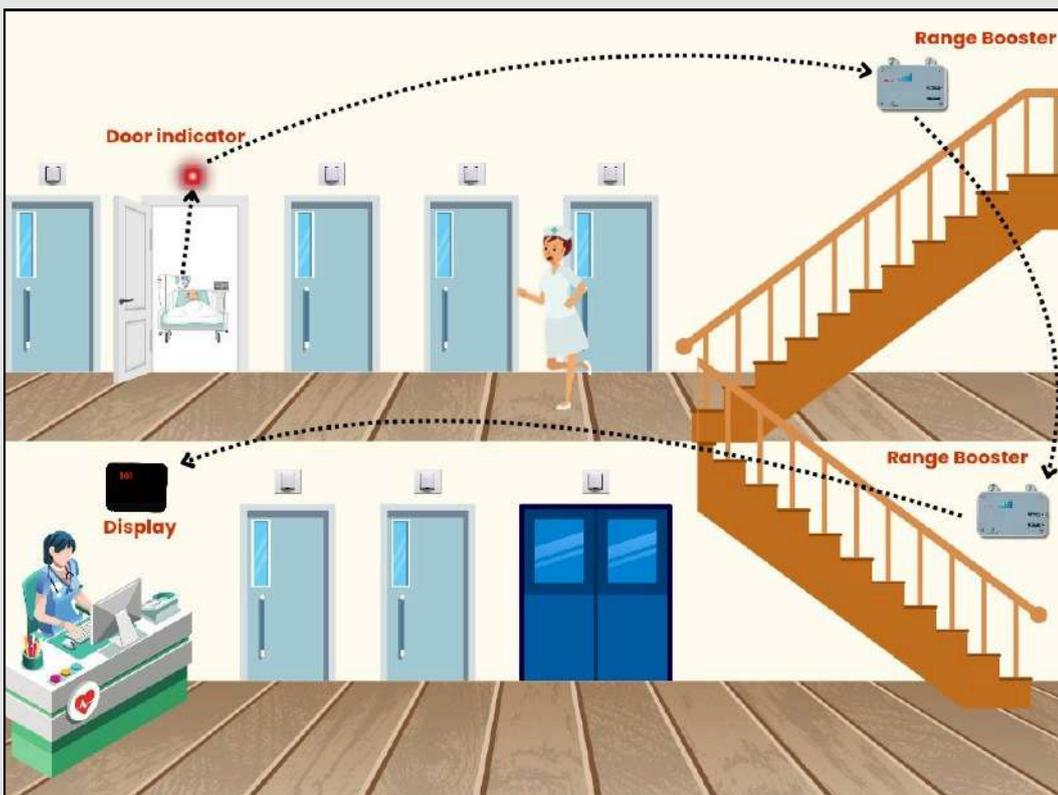

Calling Unit with Pulling Cord

A pull-cord unit lets patients easily send alerts when they can't reach the standard Calling Unit.

Applications

Washrooms Calling System
A Calling Button near the commode lets patients request help instantly, with alerts shown on the central display for quick staff response.

Range Booster
The Range Booster extends signal coverage across hospital floors, ensuring every call reaches the display without interruption.

Panic System

Family Photo

A quick-response safety solution that alerts staff or authorities during emergencies with just one press. Ideal for hospitals, schools, banks, offices, and public places, it ensures fast action when seconds matter.

Available in wired, wireless, or hybrid setups, CaringBells Panic Systems are durable, easy to install, and fully customizable.

Key Features

1. Robust, Simple & easy to use.
2. Visual and Audio Alerts.
3. Alerts for authorities for unattended calls.
4. Low Maintenance.
5. Multi-Channel Notifications.

Applications

1. Hospitals/Clinics.

12

Applications

Panic System for Hospitals

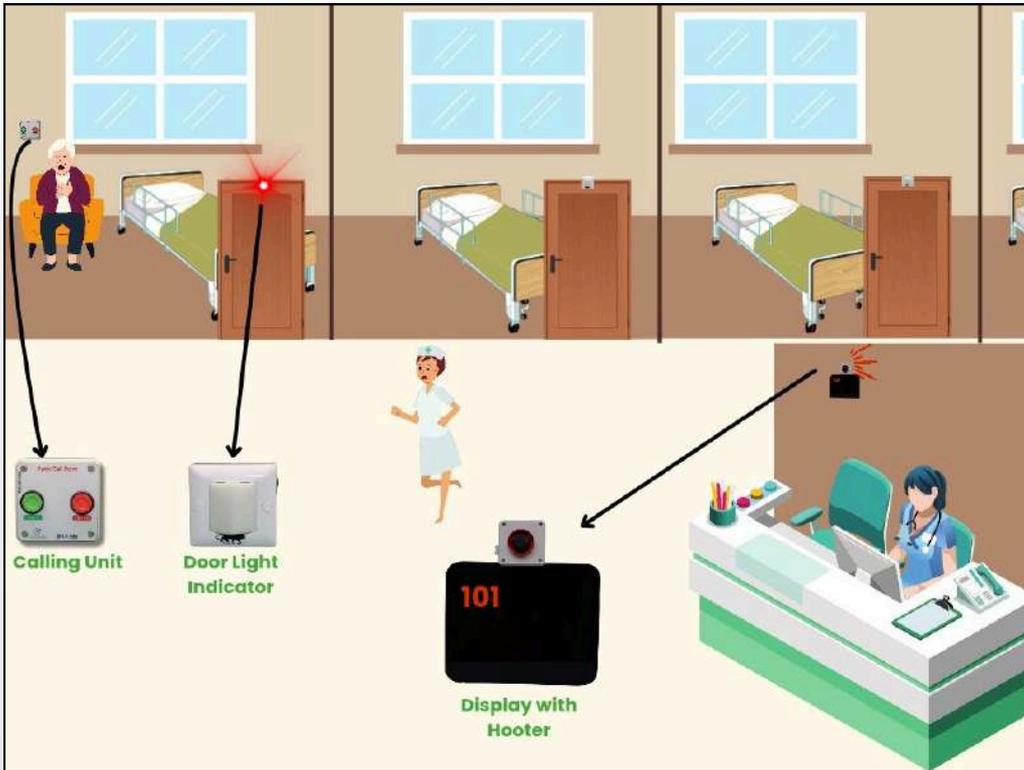

CaringBells Panic System enables instant alerts during emergencies, ensuring hospital staff can respond quickly and keep patients safe.

Panic System for School Washrooms

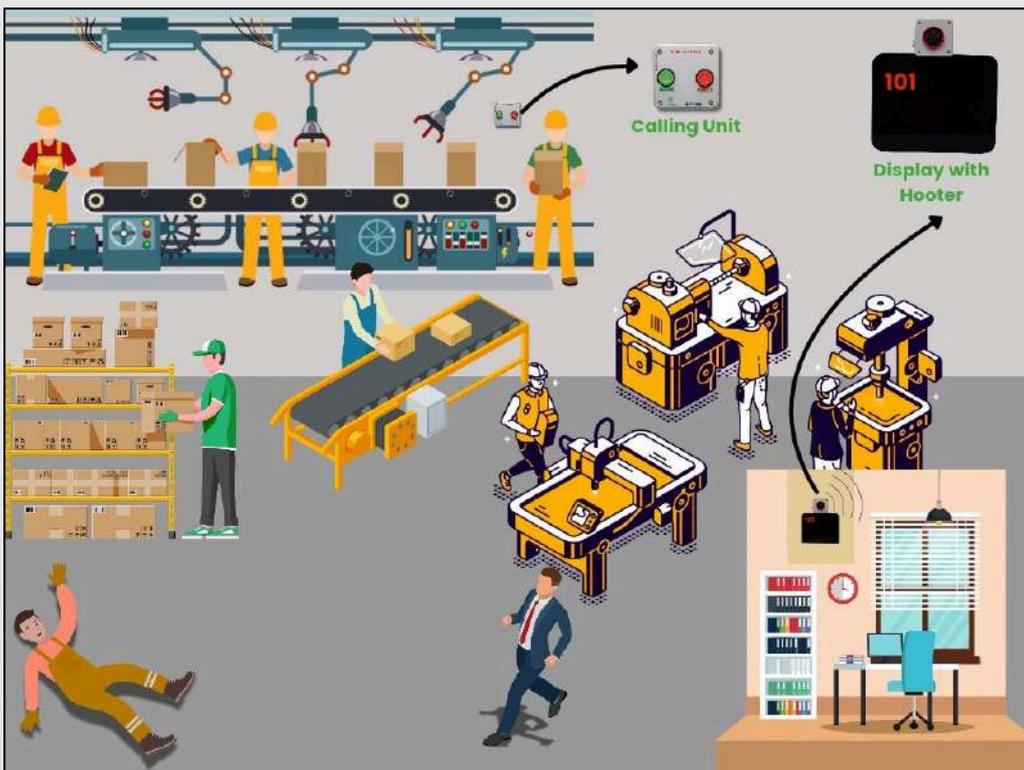

CaringBells Panic System ensures student safety by enabling instant alerts from washrooms during emergencies, allowing staff to respond without delay.

Applications

Panic System for Old Age Homes

With just one press, residents can instantly alert caregivers during emergencies, ensuring safety, comfort, and peace of mind for the elderly.

Panic System for Industries

In high-risk environments, our Panic System enables workers to raise instant alerts during accidents or hazards, ensuring rapid response and workplace safety.

Token System

Family Photo

CaringBells Token Display System helps manage queues smoothly and efficiently by displaying the next number at the press of a button. Ideal for clinics, hospitals, banks, and service counters, it reduces waiting time and ensures an organized flow.

Key Features

1. Easy-to-use for doctor/operator control.
2. Clear digital display for patients/customers.
3. Reduces crowding and improves service flow.
4. Reliable wired/wireless options.
5. Customizable for different environments.

Applications

1. Clinics & Hospitals (OPD, Labs, Diagnostics).
2. Banks & Financial Institutions.
3. Government Offices.
4. Service Centers & Customer Care Desks.

Solutions We Provide

Solution 1

Display
Token Unit

Solution 2

Matrix Display
Token Unit

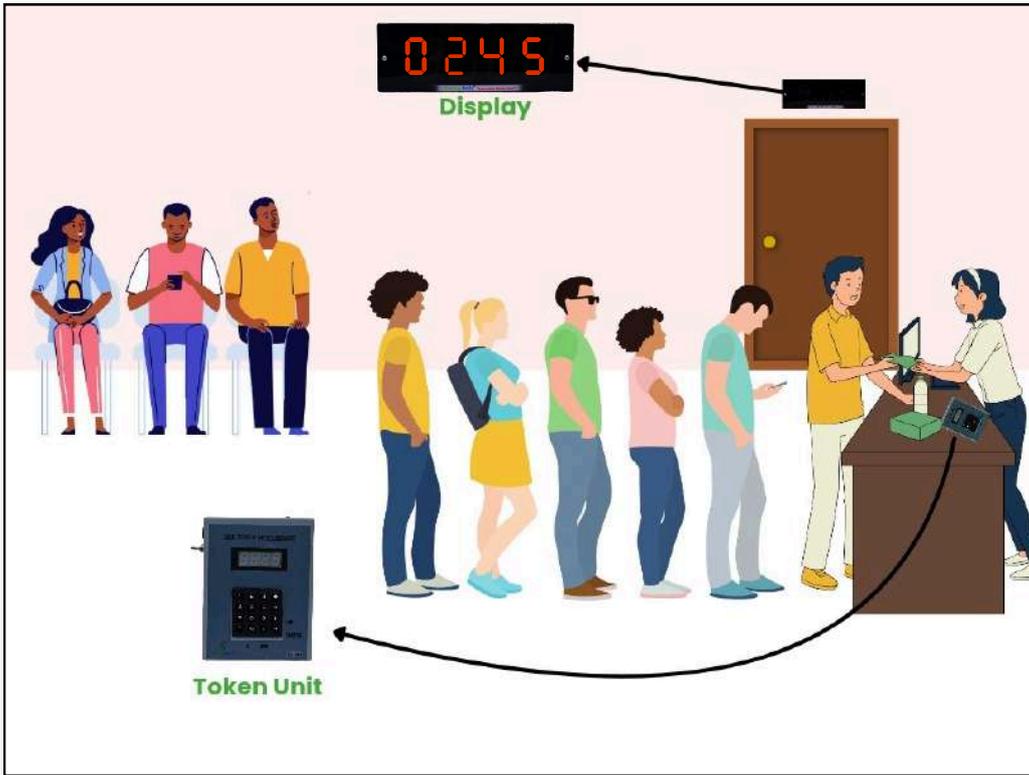

Solution 3

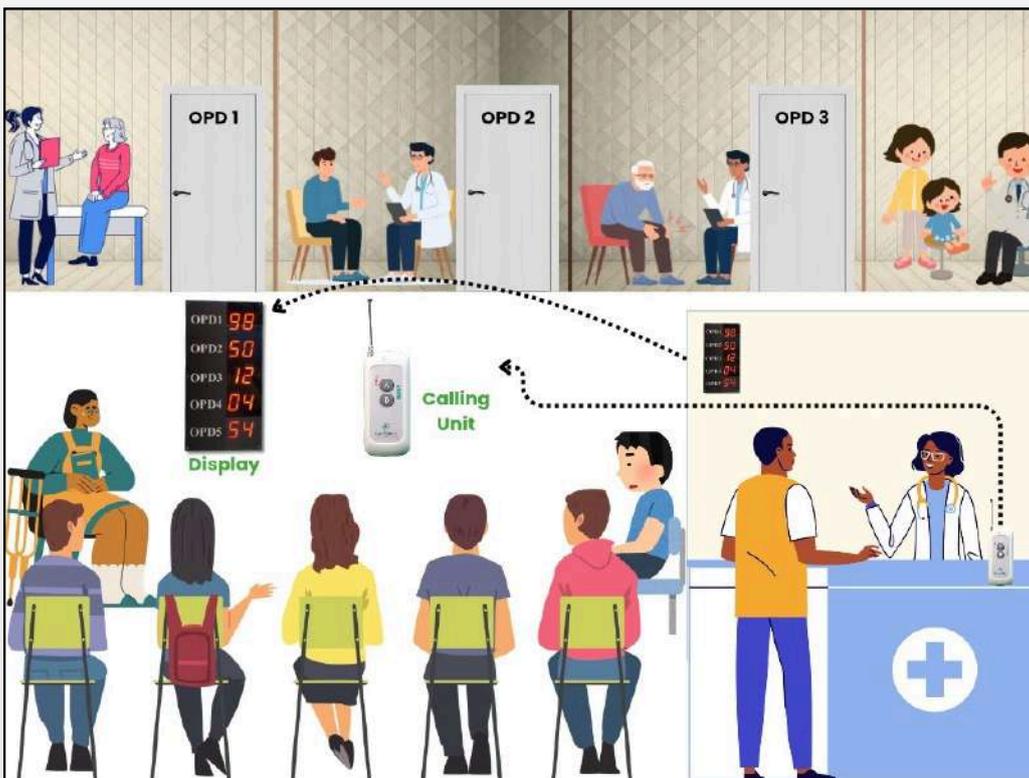

Display
Calling Unit

You can **Customize** your Solution...

Applications

The **Single OPD Token Display System** is designed for individual doctors or clinics. With a simple press, the doctor can call the next patient, and the token number appears instantly on the display—ensuring smooth flow and reduced waiting time in a single OPD setup.

The **Multiple OPD Token Display System** efficiently manages queues across several OPDs. Each doctor can control their own token call, while a common display shows all OPD numbers and token updates in real time—making it ideal for hospitals with multiple consulting rooms.

Multi-Serving System

Family Photo

CaringBells Multi-Serving System is a versatile solution that combines multiple calling applications into one integrated platform. Whether it's an OPD Token System, Peon Calling System, or Jewellery Shop Service System, everything works seamlessly through a single setup making it efficient, user-friendly, and cost-effective.

Key Features

1. One system, multiple applications.
2. Centralized monitoring & display.
3. Wired, wireless, or hybrid options.
4. Easy to install and operate.
5. Customizable as per client needs.

Applications

1. Hospitals & Clinics (OPD, Nurse, Peon Calling).
2. Offices & Corporates (Peon/Assistant Calling).
3. Jewelry Shops & Retail Stores (Customer Service Calling).
4. Institutions & Public Spaces.

Solutions We Provide

Solution 1

Display
Multiple Calling Unit with Different numbers of buttons
(upto 12)

Solution 2

Matrix Display
Multiple Calling Unit with Different numbers of buttons
(upto 12)

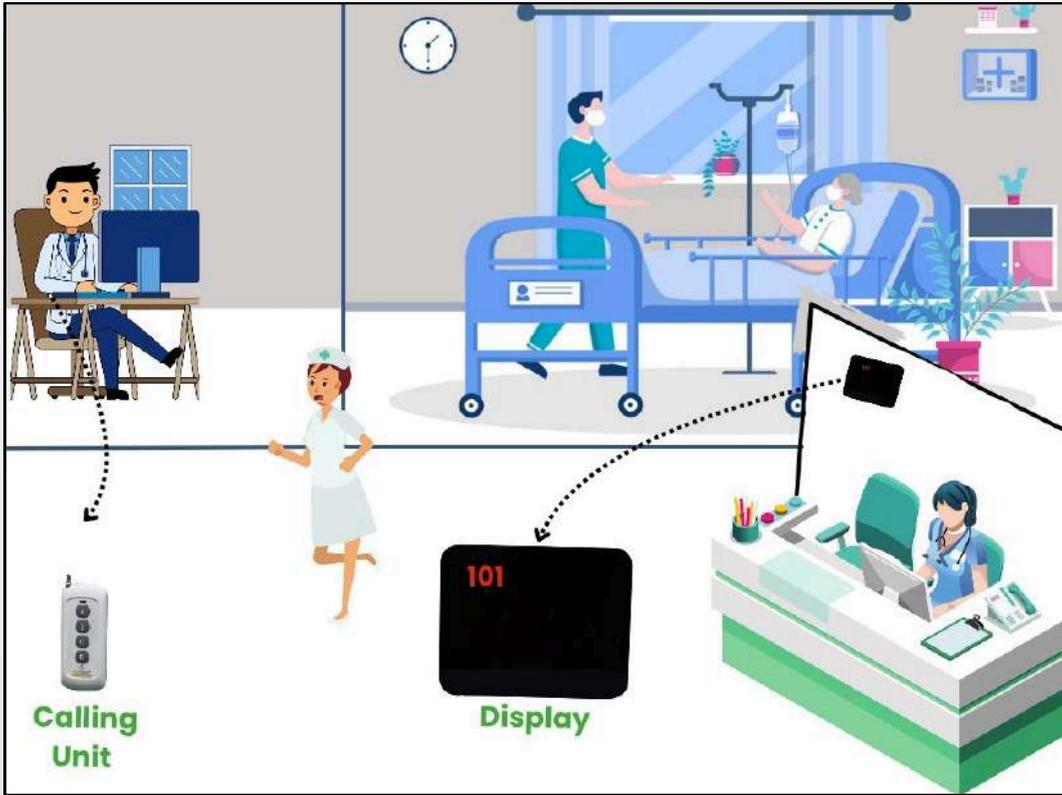

Solution 5

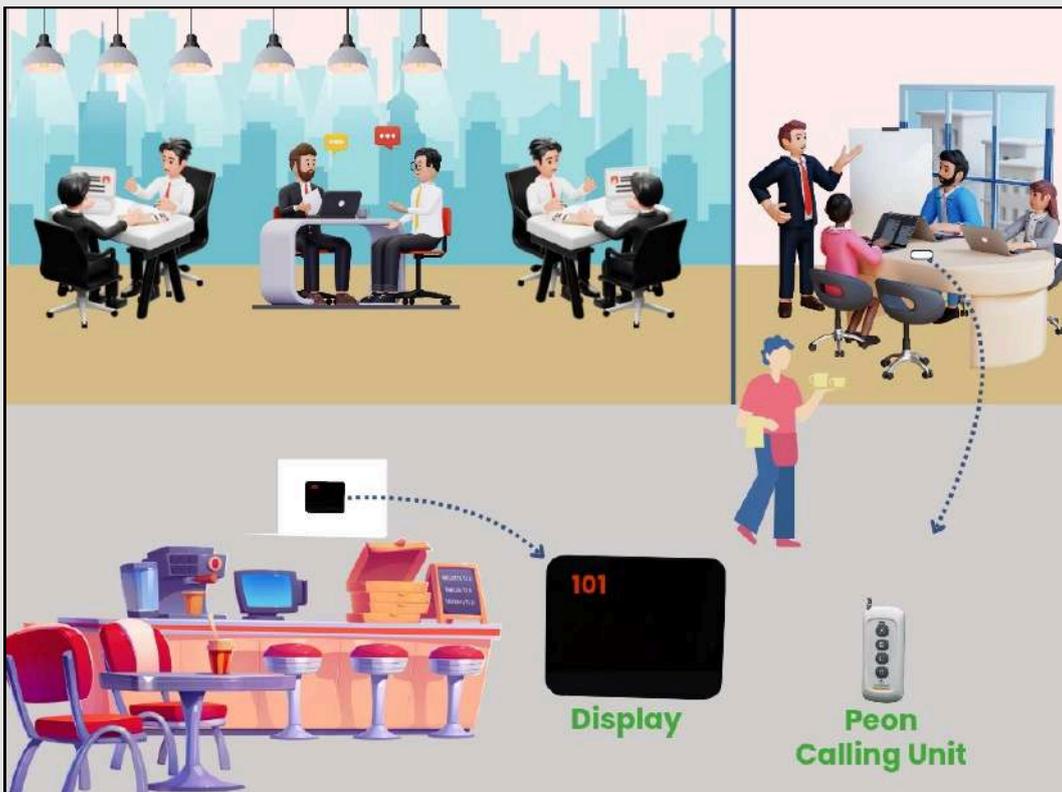

Feedback Unit

You can **Customize** your Solution...

Applications

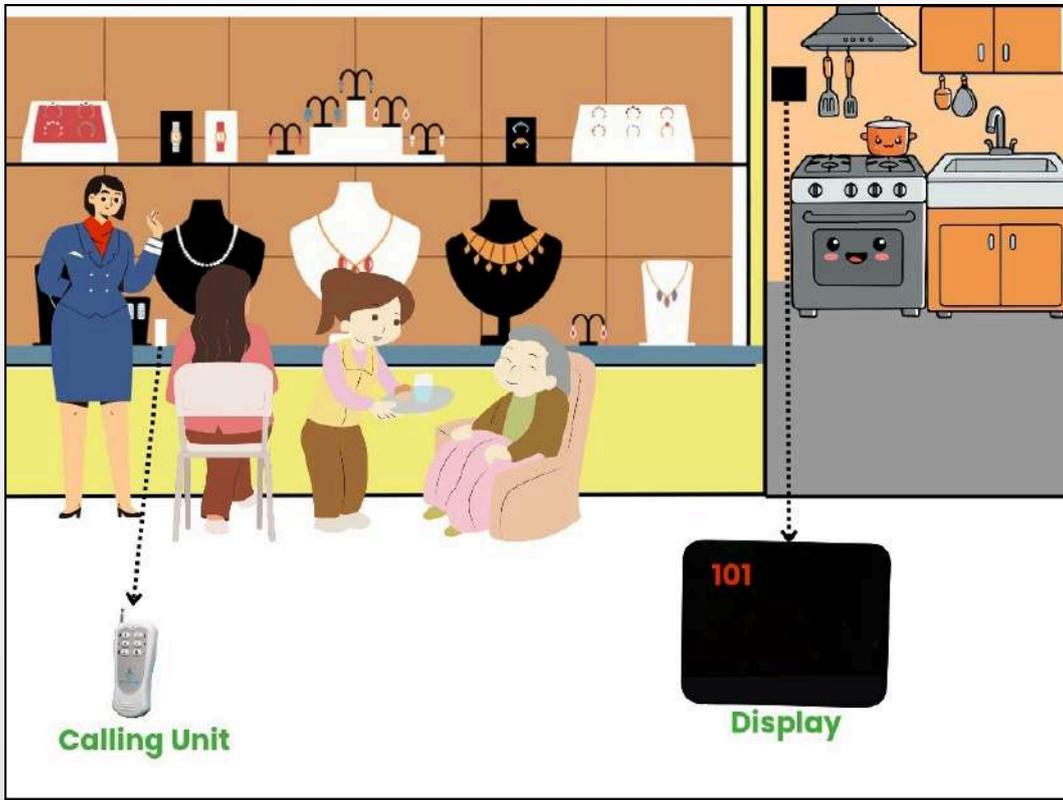

The **OPD system** lets doctors call the nurse and call the next patient instantly using a simple calling unit, streamlining workflow. It ensures faster service, smoother patient flow, and a more organized clinic experience.

The **office system** allows anyone to call the peon instantly using a simple calling unit. It ensures quick assistance and smoother office operations.

Applications

The **jewellery shop system** lets staff call the caretaker instantly using a calling unit, ensuring prompt customer service and a seamless shopping experience.

This system can be used anywhere you need—flexible, convenient, and adaptable to any environment.

Why Choose Us ?

1. NABH Friendly solutions.
2. Reliable Performance.
3. Local service support.
4. Fast Installation.
